LinkedIn | GitHub | LeetCode | Portfolio

Summary

Full-Stack Developer (NestJS, Next.js, GCP) who has shipped multi-tenant SaaS to 10+ enterprise clients and cut core transaction latency by 300ms. Google Cloud-certified (Professional Cloud Database Engineer), specializing in secure multi-tenant backends, POS/SAP synchronization, RBAC, and AI/LLM-integrated platforms across retail, healthcare, and finance.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Dart, Java, C/C++

Frontend & Mobile: React.js, Next.js, Redux Toolkit, Tailwind CSS, Shadcn UI, Material UI (MUI), Flutter, React Native

Backend & Architecture: NestJS, Node.js, Express.js, RESTful APIs, WebSockets, SOA, RBAC, JWT/OTP Authentication

Databases & Integrations: PostgreSQL, MySQL, MongoDB, Prisma ORM, Redis, Google Cloud SQL, POS Sync, SAP Sync

Cloud, DevOps & QA: GCP, Docker, Nginx, CI/CD Pipelines, Compute Engine, Cloud Storage, AWS S3, SSL, Jest, Postman, Swagger

AI & Tools: LLM API Integration (Gemini), Provider-Agnostic AI Layers, ChatGPT/Claude/Codex Agents, Prompt-Driven Debugging, Test-Case Generation, Git, Linux/Shell

Certifications

- **Professional Cloud Database Engineer** — Google Cloud Certified, 2025
- **Associate Cloud Engineer** — Google Cloud Certified, 2024

Experience

Anocloud

Software Developer

August 2024 – Present

Jamshedpur, India

- Built **POS↔SAP synchronization** workflows handling **5,000+ daily records** across billing, invoices, warehouse, inventory, and sales data, with validation and error handling that **reduced sync failures by ~40%**.
- Developed secure backend modules and admin-portal features (**NestJS, Prisma, SQL**) powering sync monitoring, role-based access, and Flutter mobile integration for a production retail client platform.
- Spearheaded the end-to-end architecture of a full-stack **Hospital Visitor Tracking System** (NestJS, Next.js, Prisma); designed a robust SQL data layer and optimized the GCP deployment, **reducing core transaction latency by 300ms**.
- Designed and deployed a **multi-tenant Invoice Generation Platform** with strict tenant data isolation, GST-compliant PDF generation, and real-time updates via **WebSockets**, onboarding **10+ client companies** through an admin dashboard.
- Strengthened platform security and delivery with granular **RBAC**, OTP-based authentication, **Dockerized** deployments, Nginx reverse proxies, SSL, and **CI/CD pipelines on GCP**, **cutting deployment time by ~60%**.
- Applied **AI-assisted engineering workflows** (ChatGPT, Claude, Codex, custom agents) for debugging, code review, documentation, test-case generation, and security edge-case analysis under manual production review.

Projects

AI-Powered LinkedIn Content Assistant

NestJS, Next.js, Prisma, PostgreSQL, Gemini AI, Docker

GitHub

- Architected a full-stack **AI content platform** (NestJS, Prisma, PostgreSQL, Next.js) to generate, edit, schedule, and publish LinkedIn content from a centralized knowledge base, **cutting content-drafting time by ~70%**.
- Implemented a **provider-agnostic AI abstraction layer** using the Registry Pattern, integrating multiple LLM providers (**Gemini**, with OpenAI/Claude support) and **cutting new-provider integration from days to hours**.
- Built an advanced authoring experience: **TipTap** rich-text editor, drag-and-drop media management, a visual image/carousel designer, and a **FullCalendar**-based scheduling dashboard.
- Containerized services with **Docker**, designed scalable REST APIs, documented via **Swagger**.

Education

RCC Institute of Information Technology

B.Tech, Information Technology — CGPA: 8.52/10.0

July 2024

Kolkata, West Bengal

- Relevant Coursework: Data Structures & Algorithms, DBMS, Cloud Computing, Software Engineering, Computer Networks.
